

STATS Brewpub | Atlanta, Georgia

Axis was hired by Canterfield Holdings to design a 10-barrel brewing system in STATS Sports Bar in downtown Atlanta, GA. STATS is located on Marietta Street next to the College Football Hall of Fame, World Congress Center and Mercedes Benz Stadium. The project involved an overhaul of their existing keg system to include an internal brewing and distribution system. This was a multi-floor design in a historic brick and mortar structure. The brewing system was installed on a mezzanine in a high-traffic area where patrons and the public have visibility of the brewing process.

Structurally, the design was a significant challenge due to the age and condition of the existing structure. Steel was introduced into the design with special connections to support the brewing system. Additional improvements were made to the dining area, coolers and bar area to support the new brewing system.

Role of Firm:

Architecture | Structural Engineering | MEP Engineering
Civil Engineering | Entitlement | Project Management
Construction Coordination | Project Closeout

Preconstruction Design Services:

Due-Diligence (Site Investigation Reports) | Field Measurements
Base Plan Preparation | Project Photos | Concept Plans
Design Drawings and Construction Documents
Permit Submittals and Approvals
Shop Drawing Review and Approvals
RFIs and Construction Phase Services | Interior Design and Décor
